Introduction To Traffic Exchanges and List Building!

Let me give you a brief explaination of this report. I love the traffic exchanges (from here on out they will be referred to as T.E.'s) and also love to build my lists. So, while I was surfing on some of my favorite T.E.'s, I thought of an idea as to how I can simply and easily build my lists and also dominate T.E.'s with the utmost of ease.

Introducing Total Traffic Exchange Domination

Now I am sure that you have heard (at least once or twice) from others that FREE T.E. Surfing is nothing more than a total waste of your time and efforts. Unfortunately for most T.E. Users this is correct. It is not because they do not work, but it is because the surfers do not understand how to use them. Or another thing that happens is that they surf for a week and feel that they are getting absolutely nowhere. For the most part this is going to be true for every single person who begins to read this report.

What my intentions are for this report is simply to do three things and wrap them all up into one report. The first being to show you how to simply brand yourself and dominate some of the popular T.E.'s that are currently being used on the internet. Secondly, I want to help you understand the power of list building through FREE Joint Venture GiveAway Events. Finally, build your lists to the max and earn your maximal potential profits online through GiveAway Events and T.E.'s.

I am not going to blow smoke up your @$$, instead I am going to tell you right now that this method will take approximately 30 days to get the hang of and must be done daily for a minimal of one hour a day. Now if you are like me and are a self motivator than you will find that after about 2 days of implementing these methods, you are going to get sucked into your computer for longer than just an hour a day. Remember that this is just a minimal amount of time that you will have to spend doing this method that you are about to learn.

So with that being said, let's get underway to Total Traffic Exchange Domination and Start Becoming a Master List Builder!!!

Traffic Exchange Myths

I want to start out by explaining to you about some of the myths that are floating around the internet about Traffic Exchanges. Remember that the most important thing that you can do right now, is just empty your mind of everything that you have already heard and read this report with an open mind.

Myth #1: Traffic Exchanges Are a Waste of Time

Now while this may seem true to you because you have already tried getting involved with some of the traffic exchanges already (and have failed!) look at it like this. If all of the T.E.s were a waste of time, then why are there over thousands of them that are on the internet right now. Obviously some marketers and business owners see the potential power in them and are currently using them to generate thousands of dollars right now as you are reading this report.

The fact is this. The reason why a good majority of surfers feel that they are a waste of time is because they do not effectively use the tools and resources that certain T.E.s provide and just go blindly into surfing for traffic.

Myth #2: I Have To Upgrade To Be Successful In T.E.s

Wow! What a joke this is. Do you realize that just by surfing for FREE and building Your referral levels, that not only can you potentially get thousands of credits per month, but you can also create multiple streams of passive income that you seriously do not have to do anything at all to make?

The key is to figure out what plan of action you will be taking. Fortunately for you, later on in this report I am going to basically hand over a blueprint that if you implement successfully, you will see what I am talking about within 30 days of reading this report twice.

Myth #3: You Will Not Be Receiving Real Hits To Your Site

Now this myth is not totally just a myth. There are a couple of T.E.s which I have encountered that fake their credits. I would just like to say that this was about 3 years ago when I first started marketing online however. Now there are many safegaurds that you will soon be aware of that will ensure that you are surfing for REAL credits and will be rewarded for such activity.

Begin Domination Of Traffic Exchanges

Now that you have an understanding of some of the statements and falicies that are floating around about T.E.s, I would like to help you understand a little bit better on how you can start to dominate your Traffic Exchange experiences.

You will find that EVERY Single Traffic Exchange has there own way of operating and that each one of them will tempt you with a variety of offers on a daily basis when you log into them. My goal here is to explain to you that if you are just starting out and do not have the funds they are asking for, then DO NOT buy the one time offers. No matter how tempting you find them to be.

The truth is that you can potentially receive more credits and also make the traffic exchange owners pay you more in referrals then you will spend on the purchasing of these one time offers. The purpose of the One Time Offers and the monthly subscriptions is for those who are not interested in taking the time to surf for credits.

So how do you go about building your T.E. Downlines and also gathering more credits for FREE? There are a couple of things that you must take into consideration when you go about getting involved with T.E.s, let's get straight to the point with them.

Things To Consider Before Getting Involved With T.E.s

The first thing that I would like to make you aware of is, if you intend on getting involved with the best and biggest of the T.E.s just to advertise your product for sale, well my friend you are going to have a really hard time. Look at it from a logical standpoint. You are trying to get involved with them because they are FREE and if you surf, you will earn credits in them to show off your site. With that being said, don't you think that it is fair to say that the majority of the members in a T.E. Are only interested in the same thing? The answer (in case you didn't know) is YES. Primarily, this is the reason why many T.E. Members fail in correctly using a Traffic Exchange.

The second thing to consider when you are getting ready to use a T.E. Is what are you going to advertise? Well for this I would like to point out to you that the majority of the users in any T.E. Are more than likely surfing at least 5 other different T.E.s to earn credits for. Now with an average time of 20 – 30 seconds that you must stay on the page to gain the credit to your account, many members will be using tabbed browsing and just surfing from tab to tab in order to get their credits. My point is that if you are intending on using a typical website to advertise, then more than likely you will not see any benefits for you except the traffic that will go towards your search engine rankings.

Now do not get excited about that because those will not even remotely effect your page rank due to the fact that the traffic that will be given to you will be for just a second or two and they will click on an image to see the next page.

Next you should consider how you are going to go about branding yourself online through the T.E.s. There are many T.E.s out there which are becoming more and more popular due to chatting features, team creations, etc. As you are creating your T.E. Accounts you should have a good idea as to how you are going to put together a creative and compelling profile. By doing this, you will be able to brand yourself and get more organic traffic to your websites better.

Finally, you should be thinking about which T.E.s are the best for surfing and how do I go about finding them. This is an easy fix. Later on in this report I will give you those solutions to the three problems which I have mentioned above. For now, let's just say that there is a FREE website which will allow you to surf through the top 100 T.E.s online and find them according to your peers (or other T.E. Users).

Traffic Exchange Solutions

What To Advertise In a Traffic Exchange

Previously I have mentioned how some users will just blindly go into finding a T.E. Which they like the look and feel of and for their promotion efforts they will begin advertising paid products/sales pages all through out their T.E. This is the one thing that you really want to stay clear of doing. Many of the users in each Traffic Exchange are looking for FREE traffic to their individual site, so for them to actually spend money in a Traffic Exchange is going to be extremely rare. If this is the case, then what should you promote?

Simply put, you want to promote pages which are referred to as a SPLASH PAGE. A splash page is nothing more than a single webpage that is creative, eye-catching and normally will offer a FREE product or entry to another T.E. These pages are also only the length and width of a monitor screen. Normally you would want to try to make sure that your Splash Page does not go beyond the fold of a computer screen. What this means is that you do not want to have the user to scroll down to read or see any of what your splash page is about.

If you are going to offer a FREE product, make it something of value (usually something that allows for the user to pick up a MRR product or a GiveAway Product). One thing that I have found that has helped me in the past with T.E.s is offering a traffic generating product or a Joint Venture GiveAway Event invitation (I will get to the GiveAway events a little bit later).

Branding Yourself In Traffic Exchanges: Profile Creation

This is a tricky one. The reason why I say this is because you really do not want to take that much time in creating your profile in any T.E., however in the checklist that comes with this book, there are 10 that I strongly recommend that you do take your time with when it comes to your profile. You see your goal if you are getting involved with T.E.s is that you want to run an insane amount of traffic to your URL address, in as many different T.E.s as possible. So the only thing that I strongly recommend that you do is have a photo of yourself (no more than 190 x 190 pixels large) and use that in your profile along with your URL address, blog address, etc. and any other parts that you can fill out along the way. Now each T.E. Has a different set of profile creations that you are able to use. In a nutshell, only fill out the information that you would not mind the entire world having

access to. Try to keep it business geared, but add a touch of your personality into them. This will make you be more accepted among some of the users in the T.E.

Where Do I Find The Best T.E.s To Get Involved With?

You are going to hear a lot of various T.E. Users that will tell you that you should go to this exchange and stay away from that exchange. It is kind of if you were getting into the internet marketing niche and you were listening to one guru instead of another. Well when it comes to finding T.E.s then you really need to set up an account with Affiliate Funnel. Affiliate Funnel is a FREE website that you can join which is where every T.E. User goes to vote on (or rank) in their opinion is the best. The scale is on 1 – 10 with 10 being the best.

When you set up your account with Affiliate Funnel, you are going to want to take about a half an hour to scope out what Affiliate Funnel is all about. There is so much that you are allowed and capable of doing that you can start building downlines, earn referral commissions, promote your own products, and so much more. You are really going to want to take the tutorials that are inside of the members area just to familiarize yourself with the site.

Remember that with Affiliate Funnel, these rankings are for the T.E.s that have been certified through a variety of checks and balances and have been rated amongst the T.E. Users. What this means is that some of these may actually have been bribed to get where they have been. The whole rankings of them are opinion based. I recommend that you only surf those exchanges that are suitable to you.

Traffic Exchange Features

There are thousands of different T.E.s that you can get involved with. The problem is that many of the users do not really understand the features that each T.E. May have when they get their account. Below you will find a brief explaination of some of the more popular features that you will be seeing in them.

Super Surfing and Elite Surfing Clubs

I really like these because what they do is give you an added bonus percent to add to your credits while you surf. These are just two of the different kind of clubs that I have run into and that I use on a daily basis. The first is the Super Surfing Club. This club is a list of Traffic Exchange owners which have partnered up together in order to get all of their T.E.s surfed more frequently. The Super Surfing Club includes five T.E.s. StartXchange, IloveHits, Traffic Splash, Dragon Surf, and TopFlightTraffic. If you are able to surf all five of these T.E.s at the same time, then you will get a higher surfing bonus added to your current level of credits that go into your account.

The Elite Surfing Club is a group of three different Traffic Exchanges which have partnered together. These three are Traffic Witch, Royal Surf, and Blue Surf Traffic Exchanges. Again the concept is to get there members to surf at a more frequent level so that their prospective Traffic Exchange will grow further.

Online Chatting and Surfing

This is a newer feature that is only about a year to a year and half old. The idea around this feature was to give the Traffic Exchange more of an integrated use. I personally do not use it because when I log into my Traffic Exchanges, I am there to surf and not to chat. Also I have found that when the chat feature is on, it slows down the surfing due to the consistent updates that need to be done within that exchange. Ideally, this feature would be good for that person who is running a team/group within the T.E. And would like to talk to their teammates.

Bonus/Prize Pages

Almost all of the T.E.s now a days have what are called bonus pages or prize pages. Usually they are set to show about once every 20 – 50 sites surfed. The frequency that you will find these types of pages really depend on the owner of the site that you are with. The prizes/bonuses include things such as extra traffic credits, extra text link impressions, extra banner impressions, etc. The idea behind these prize/bonus pages are to get the members to surf more frequently and they are used as an incentive/perk.

Increased Surfing Ratios

There are some Exchanges that will gradually increase your percentage of traffic credits per page that you surf. This is done without you really noticing, but what will happen is after about 25 – 35 pages that you surf, you will notice that your surfing ratio will increase. This ratio which I am referring to is the credit earn per pageview. Some exchanges will have a credit of something like 0.3 or 0.4 and upwards. This just depends on which exchanges that you are surfing at the time.

Word Fills and Puzzles

These are more like prize games. For example, you may find yourself that you are involved in a Traffic Exchange which has a word in white either in the bottom right or one of the corners of your screen. The object is to surf until you find all of the letters of that word and they are colored in. Once this objective is completed, you will earn some kind of prize (usually traffic credits of 100+).

There are more fun games that you can find within some of the T.E.s. Some of them have hangman, higher-lower card games, spinning wheels and etc. No matter what the game, the result is the same. Upon successfully completing the game you will earn either traffic credits, banner impressions, or text link impressions.

These are just some of the features that you will soon be discovering inside of the various Traffic Exchanges which you will be getting involved with.

Recommended Traffic Exchanges

Below you will find a list of the Traffic Exchanges which I personally am involved in. Currently I surf around 20 of them in a set daily cycle. I use 10 Traffic Exchanges every single day, while the others are lists that I just join to get my FREE product or Joint Venture GiveAway advertised. I am just going to list and briefly describe each of the 10 that I use on a daily basis to give you an idea as to which ones I use and why I use them.

StartXchange

This is one of the Super Surfing Club Exchanges. As I log into my account for this one, I also get the activity bonus which goes along with it. I especially like this T.E. Due to the fact that the owner, Tim Linden, adds all sorts of activity bonuses throughout this exchange. This has to be my favorite exchange surf. There are chat features, activity bonuses for reading his blog, and bonuses for every 50 pages surfed.

Traffic Splash

This is also one of the Super Surfing Club Exchanges that I like and use. In my opinion it is extremely basic though. Although you get the increased credit ratio for Super Surf, the only thing that is a bonus is a prize page after every 12th page that you surf. The thing about the prize page is that not only do you have the opportunity to receive the traffic credit, banner impressions, or the text link impressions, but you can also get something called SplashPoints. These SplashPoints can be used for a variety of things.

Traffic Witch

This exchange I use for two reasons. The first being is that it is part of the Elite Surfing Club. The second reason is because it is owned by Guido Naussbaum. In my opinion, he is one of the best Internet Marketers which I have come across online. The exchange itself is very high graphic and just pops out at you. As for the bonus pages and surfing ratios, it is competitive with the other exchanges. I have seen some bonus pages that he has done where he gives away FREE products which are of high value. All in all it is a good exchange.

Dragon Surf

I have to be honest here on this one. I really only surf this one because of the fact that it is part of the Super Surfing. I really do not like the graphic design that has been done with it, however they do supply you with bonus pages after every 12th page that you view. There is a blog that is informative (if you choose to read it) and also the promo materials are pretty good.

IloveHits

This exchange has been around for a little while. I really use this exchange as part of the Super Surfing Club. The thing that I like about this exchange is that the theme is geared around a boxer and the parts and the branding opportunity that they allow you to have. Inside of the members area is something called a "locker room." This is basically your profile settings. You are allowed to add your twitter, blog, URL address, etc. This is definatly one that you want to spend a little time on your profile. As for their bonus incentives, I think that they could be a little bit more forthcoming. All I have seen so far is that every now and then you can get a 2 credit bonus on a page and also there is an admin check that asks you a question about surfing for you to continue.

TopFlightTraffic

This is a fairly new exchange, but I really enjoy the surfing on it. It is a part of the Super Surfing Club. The main them on this exchange is geared to fighter piolets, and military. The graphics are superb and as far as the bonuses go well, you have the opportunity of finding 5 credit bonuses on some pages, a word fill, and also there are various bonus pages scattered that have a pic of a ship that you have to sink with a missle of sorts. All and all I would actually surf this exchange even if it wasn't a part of the Super Surfing Club.

Royal Surf Traffic

This exchange is themed around the midevil time era. It is a part of the Elite Surfing Club. That is the main reason why I surf it. However this is an exchange that has an extensive profile page as well. Not to mention that there are referral bonuses, promo materials. The bonus page is more like a 10 part saga. You have to find your way from the top of the screen to the bottom of the screen in stages. Not really keen on that but I guess some do like this feature.

Blue Surf Traffic

This is the final traffic exchange that is teamed up in the Elite Surfing Club. I like the simplicity of it, however it is still fairly new to me, so I really do not know if it is an exchange I would surf if it was not a part of the Elite Surfing Club.

ClickVoyager

I really like this exchange. It is not a part of any of the surfing clubs, however I like the fact that there are prizes scattered frequently throughout your surfing experience. Not only that but there are many games that can be played for traffic credits. There is a word fill that keeps you surfing to find all of the letters to the word clickvoyager, there

are also hangman pages and also high-low card game pages. The hangman pages are fun just to get away from traffic surfing every once in a while. The maximum amount of credits a free member can earn from hangman is 70. The high-low card game is pretty quick and easy as well. A card flips up and you have to decide if the next card will be higher or lower. If you choose correctly then you multiply your credits earned. If you choose incorrectly or the same number card flips over then you lose your credits for that page. There is also an option of keeping the credits without playing the game. They also have a surfing league and a CV slot spin. I guess over all I just really like to surf this because it takes the traffic surfing aspect and makes it fun.

High Hits Traffic Exchange

This is the last exchange of the 10 that I surf on a daily basis. This is a fairly new and upcoming exchange that gives a lot of credits for each page which you surf. Currently I am receiving 10 credits per page view. Now I am not sure as to how many credits = 1 page view per member. This exchange does however have and excellent design and keeps you interested while you are surfing for traffic.

The above list exchanges are MY TOP 10 Traffic Exchanges that I would recommend that you become involved with right away. If you were not interested in the final two exchanges, then replace them with another exchange. Like I have said earlier that the other two are just basic exchanges that I have fun in.

JV GiveAway Event Involvement

We have all heard that old internet saying. You know the one that I am talking about, "The Money Is In The List!" Well that is very true. If you build a big enough list, then you have the capabilities of pretty much writing a paycheck to yourself each and every week. The problem is that the majority of online users do not understand how to build a targeted list. In fact if you go to some of them, they will say that you are just absurb if you giveaway FREE products to people. Well my friend, it is time to change your mentality. I want to explain how you can give away FREE products and still become successful in your Traffic Exchange endevours.

You see, each of the exchanges that you will ever get involved with will actually pay you money for referring people. Or they will exchange more traffic credits for the direct referrals that you recruit. The only question remains is "How do I get sign-ups for the traffic exchanges which I am in?" This is the easy part. If you remember, I suggested that you should only use traffic exchanges and advertise Splash Pages. Well on those Splash Pages is where you advertise a FREE informational product. **Hint, Hint: You can use this report that you are reading right now!** So you build a Splash Page with this product on it and go through the process of setting up a FREE hosting and Website Address (you will get this information in the checklist guide that has been supplied with this product) and you upload it to your FREE hosting account. After that task has been completed and you have checked to make sure that everything is good, then you begin to use this product in Joint Venture Giveaway Events.

What is a JV GiveAway Event?

If you are unfamiliar with the term of JV GiveAway Event, then here is your crash course. These types of events are constantly running all over the internet and are usually for internet marketers. However, as long as you own a digital product (graphics, book, audio, video, etc.) with the rights able to be passed along with it, then you can sign up to be a contributor to each of these events. A contributor is a person who submits a high quality product for others to sign up for and download.

How Do I Involve JV GiveAway Events With T.E.s?

As I have stated earlier, the JV Giveaway Events are completely FREE of charge to sign up with. The entire purpose of a Giveaway Event is to build a list. Are you starting to see where I am going with this? This is hour #3 of each day that we are going to use. You are going to want to go to http://newjvgiveaways.com/ and look at the events which are searching for contributors. I highly recommend that you get involved with every event which you can possibly get involved with. This is kind of branding yourself in this crowd as well. You will be asked on every single event that you sign up with, if you would like to

purchase the one time offer that they have. The price ranges on these events for the upgrades are anywhere from $7.00 - $37.00, depending on the host of the event. I do not recommend purchasing them. As I have said earlier, this entire report is dedicated to the "newbie" or the marketer on a budget. I would not feel right in trying to explain to you the advantages. There are advantages to being an upgraded member to these events, however I think that you could put your money to better use then that.

Each of these events will require you to have three main components to your gift submission. A Squeeze/Sign-up Page, A Confirmation Page, and a Download Page. All of these pages should have been uploaded to your FREE hosting account before you began to sign up with the events.

After you have completed these tasks, then you are ready to move on to incorporation of JV GiveAway Events and Traffic Exchanges. This next chapter will help you to build your list. Remember that this is a process that will take a little bit of time. Do not think that you are just going to be able to throw up a gift submission in a couple of giveaway events and then throw that promotional link from the event into a couple of exchanges and you are going to have a long, big list overnight. That is just not the case.

List Building Through Traffic Exchanges and JV GiveAway Events

So by now you should have gotten started with your traffic exchange involvement and also your JV GiveAway Event involvement. Here is how you are going to be building your very own business list and also building your Traffic Exchange Downline at an exponetial growth rate that it will eventually become viral.

Promoting The Traffic Exchanges

There are a couple of good ways to promote your Traffic Exchanges that you are currently involved with. The thing to remember is that you must be creative and think outside of the box. A splash page of one exchange being thrown into another exchange hoping that you get lucky to have someone not involved with the traffic exchanges is becoming very slim. The way that I look at it is something like this. If you are already surfing traffic exchanges, then you are going to be in the more popular exchanges that people are promoting. So then what would work?

Well how about Creating a banner display of your top 20 banners on an .html page? That will give the viewer more of a choice and maybe there is an exchange that they are not already surfing. Remember that most traffic users are looking to brand themselves to the masses. So the overall thought behind this method is that instead of using a splash page for just one exchange, create one that has 20. More of your referral links will be shown at the same time.

Second idea for you to think about: Create a report or buy a report that has private label rights to it and edit it with your links. By using this method you are actually going to be accomplishing two things. 1. you are going to build an opt-in list of your own because you are going to want to make sure that you collect a name and email address before they download your product, and number 2. you are going to be able to supply high quality information while putting in your referral links under different portions of the report. This is the method which I prefer. In fact you are witnessing this method right now as you are reading.

Third Idea for you: Tweet and Blog to your followers about your success with certain traffic exchanges, and then when you post your referral link for that traffic exchange you will be able to get credit if they sign up for the exchange.

Last Idead for you: Submit some high quality content in the form of an article to some of the major article directories. There are two things that you can do with your articles. First you make them informative and yet do not conclude them (this will leave the reader of your content article wanting more information) and the other thing is to have a quality related bio box to advertise your link to a traffic exchange of your choosing.

By doing this method you will have submitted a unique article which will just stay out in cyber world till the end of the internet. So this has the potential of bringing your site (referral link for the T.E.) some long term organic traffic.

Promoting JV GiveAway Events In The T.E.s

This is the method of choice for me. Many people will say that they do not get involved with either one of these methods just because all of the downline/subscribers are just FREEBIE SEEKERS. This is such a big myth! Don't get me wrong, you will always have to deal with people that are expecting something for nothing, however those are the types of people that you will want to have in the long run as well. You see those types of people will be easily persuded into supplying testimonials, testing your products, etc. These are also the people who nine times out of ten will do nothing with your product (or anyone else's for that matter) except let it sit on their hard drive collecting cyber dust.

So you have your JV GiveAway Events that you are contributing to right?

If Not do not worry, just follow the checklist in the guide accompanying this report!

Here is what I have found that works. In almost all of the Giveaway Events that I have been involved with, they require you to not only promote for contributors but also for members. That is where your FREE membership to your Traffic Exchanges are going to come in handy. Each of the T.E.s that you are going to be involved with give you at least three site add-ons that you can have as a FREE Member.

What you are going to want to do now is add the contributor referral links that you have for your giveaway events that you are involved with into your website URL of your Traffic Exchanges. Then go back to the Giveaway Event, and look up the promotional material and see if there are some banners for the event. Normally there are. Each of the Traffic Exchanges will allow the use of banners (must be in 468 x 60 pixels, I think that is the right length and width) which you can use to promote the events which you are involved with. Don't worry if this is confusing you right now, the checklist guide with this report will give you detailed step-by-step instructions from start to finish.

After you have entered in the Contributor URL, the Banner promo that you got from the event, you are going to want to make a text link ad for inside of the Traffic Exchange.

This text link can only be so long (I believe that it is 25 characters or so). This has to be short, sweet, and catchy. Each of these links can make you that much more list members or downlines for your giveaways that you are involved with.

After all of that has been approved by the admin of the traffic exchange, then you are good to go and surf away. It is important to realize that normal acceptance by most admins are within 24 hours. So you should not just wait for the admin, continue to surf while you are waiting for your site, banner and text link ad to be approved. This way you can still earn traffic credits, banner impressions and text ad impressions that you can go back and assign to once your information has been approved.

Conclusion

Well so far there has been a lot of information which has been provided for you, I am sure that a lot of it you are still kind of fuzzy about. I strongly suggest that you give this report another read through so that you can understand it fully and see the logic in the methods which have been presented to you much clearly.

Remember that these methods can and will improve your listings in your Giveaway Events along with building your list and building your downlines in the Traffic Exchanges that you belong to. The only thing that you have to understand is that no method will ever work out for you if you do not implement what you have learned.

Traffic Exchanges are still a popular way of generating FREE quality traffic to any of your sites that you choose, it is just being able to generate enough credits to see them working for your benefits.

I hope that you have learned a lot and will implement these methods when it comes to generating traffic to your website in the future. Take care of yourself and happy surfing!

If you have any questions or comments, please email me at tedomination@gmail.com and I will answer them to the best of my abilities. Also do not forget to go ahead and look at the accompanying reference guide for a complete step-by-step checklist to get you started in as little as 24 hours from now!

Sincerely,

Jason Conway
Total Traffic Exchange Domination
